

Lab 2: Basic Flow Control

CSE/IT 107

NMT Computer Science

“When you come to a fork in the road, take it.”

— Attributed to Yogi Berra

“Simplicity is the ultimate sophistication.”

— Leonardo Da Vinci

“How do we convince people that in programming simplicity and clarity – in short: what mathematicians call elegance – are not a dispensable luxury, but a crucial matter that decides between success and failure?”

— Edsger Dijkstra

1 Introduction

2 Submitting

Files to submit:

You may submit your code as either a tarball (instructions below) or as a .zip file. Either one should contain all files used in the exercises for this lab. The submitted file should be named either `cse107_firstname_lastname_lab3.zip` or `cse107_firstname_lastname_lab3.tar.gz` depending on which method you used.

For Windows, use a tool you like to create a .zip file. The TCC computers should have 7z installed. For Linux, look at lab 1 for instructions on how to create a tarball or use the “Archive Manager” graphical tool.

Upload your tarball or .zip file to Canvas.
