

Lab 12: Project

CSE/IT 107

NMT Computer Science

“The limits of my language mean the limits of my world.”

— Ludwig Wittgenstein

“Any sufficiently advanced technology is indistinguishable from magic.”

— Arthur Clarke

“Imagination is more important than knowledge.”

— Albert Einstein

1 Introduction

This will be your final lab for the semester.

2 **tkinter**

3 Exercises

Boilerplate

Remember that this lab *must* use the boilerplate syntax introduced in Lab 5.

battle.py

battle_server.py

4 Submitting

Files to submit:

- battle.py (Section 3)
- battle_server.py (Section 3)

You may submit your code as either a tarball (instructions below) or as a .zip file. Either one should contain all files used in the exercises for this lab. The submitted file should be named either `cse107_firstname_lastname_lab11.zip` or `cse107_firstname_lastname_lab11.tar.gz` depending on which method you used.

For Windows, use a tool you like to create a .zip file. The TCC computers should have 7z installed. For Linux, look at lab 1 for instructions on how to create a tarball or use the “Archive Manager” graphical tool.

Upload your tarball or .zip file to Canvas.
