Lab 5: File I/O

CSE/IT 107

NMT Computer Science

"If you don't think carefully, you might believe that programming is just typing statements in a programming language."

— W. Cunningham

"Only ugly languages become popular. Python is the exception."

— Donald Knuth

1 Introduction

2 File I/O

3 Program Boilerplate

4 Exercises

something.py test

5 Submitting

Files to submit:

- hailstone.py

You may submit your code as either a tarball (instructions below) or as a .zip file. Either one should contain all files used in the exercises for this lab. The submitted file should be named either `cse107_firstname_lastname_lab5.zip` or `cse107_firstname_lastname_lab5.tar.gz` depending on which method you used.

For Windows, use a tool you like to create a `.zip` file. The TCC computers should have 7z installed. For Linux, look at lab 1 for instructions on how to create a tarball or use the "Archive Manager" graphical tool.

Upload your tarball or .zip file to Canvas.
